Regarding the Western Maryland pH Total Maximum Daily Loads for the
Casselman River, George's Creek, Savage River, Upper North Branch of the
Potomac River, and Wills Creek Watersheds

The Maryland Department of the Environment (MDE) has conducted a public review of the proposed Western Maryland pH Total Maximum Daily Loads (TMDLs) for the Casselman River, George's Creek, Savage River, Upper North Branch of the Potomac River, and Wills Creek Watersheds. The public comment period was open from August 9, 2007 through September 7, 2007. MDE received no written comments.
